areas of specialization

AI • Health Care • Machine Learning • Open Source • AI Safety & Fairness

languages

English & Estonian (native) • French & Spanish (working) • Mandarin (beginner)

immigration

Alien Worker, Extraordinary Ability (green card = acquired)

professional experience

2022-present

Visiting Professor, University of Tartu, Institute of Computer Science

Research, development, and delivery of curriculum to teach the fundamentals of AI, data science, and large language models such as ChatGPT to graduate students and faculty.

2022-present

Chief Executive Officer, One Fact Foundation

Founded a 501(c)(3) non-profit to scale the AI models I have developed to improve health care: raised \$350,000+ in institutional grants and backing from institutions including the NIH, Columbia, Stanford, and UPenn. Built a team of 20+ contributors. Awarded grants from the NIH to train faculty from 50+ medical schools in artificial intelligence algorithms for health care, and contracts from UPenn and Princeton to develop and deliver courses on AI. Collected data from 4,000+ hospitals to build Payless Health. Trained a health fund analytics team to use our open source tools to allocate their \$1B+ spending and create incentives for their 200,000+ members that steer employees toward low-cost, high-quality health care.

2023-2024

Lead Machine Learning Research Scientist, Phare Health Limited, London, England Built transformer models that pre-train on clinical notes, now deployed to customers. Optimized multi-GPU pre-training and inference deploy times from 20 to 2 minutes. Developed scalable embedding models on millions of sentences for tens of thousands of entities using vector databases, parallelized over dozens of GPUs using fully-sharded data parallelism. Engineered infrastructure to distribute hyperparameter tuning to dozens of GPUs using Ray on Amazon Web Services and Google Cloud Platform. Created visualizations of 700+ DRG codes and 20,000+ ICD codes used in hospital departments, with case mix index statistics and financial projections using my previous background working with 4,000+ hospitals' public price sheets.

- 2020-2022 Officer of Research, Columbia University, Department of Computer Science; NewYork-Presbyterian/Columbia University Irving Medical Center, Vagelos College of Physicians and Surgeons

 Developed machine learning and statistical methods for women's health, mental health, and health disparity. Advised graduate students, undergraduate students,
- 2013-2020 Founder & Board Member, Useful Science

 Built a non-profit science communication organization (200+ volunteers, 2M+ pageviews, 20k+ subscribers, 1M+ podcast downloads). "Won \$50,000" on the Canadian Dragon's Den.
 - 2016 Research Internship, Google Brain. Host: Eugene Brevdo Contributed to probabilistic machine learning methods in the TensorFlow library.

and high school students in research, which resulted in several publications.

- 2015 **Research Internship, DeepMind.**Developed AI models for text and time series advised by Andriy Mnih and Koray Kavukcuoglu.
- 2013 **UI and UX Designer, Ottawa Hospital Research Institute**Led design and testing of a federally-funded mobile app (CANImmunize) used to submit vaccination profiles to the government; now used for COVID vaccine tracking across Nova Scotia.

education

- 2020 Ph.D., Physics, Princeton University. Advisors: David Blei & Shivaji Sondhi.
- 2015 M.A., Physics, Princeton University
- 2013 B.Sc. First Class Honours in Mathematics and Physics, McGill University
 Top 10% cumulative GPA; Dean's Honour List; Dean's Multidisciplinary Undergraduate Research List.

research experience

- 2018-2020 Visiting Researcher, Host: Kyle Cranmer

 New York University, Center for Data Science & Department of Physics

 Applied probabilistic modeling approaches to study statistical physical systems.
- 2014-2020 Graduate Research Fellowship, Advisors: David Blei & Shivaji Sondhi

 Columbia University, Departments of Computer Science and Statistics

 Princeton University, Department of Physics

 Developed deep learning and variational inference methods with applications to

Developed deep learning and variational inference methods with applications to recommender systems and physics.

honors, awards, & fellowships

- 2023 TEAK Fellowship National Mentoring Month Spotlight
- 2023 Carriage House Birth Partial Scholarship for Doula Training
- 2022 HmntyCntrd Scholarship to attend Humanity-Centered Design Masterclass
- 2021 Columbia scholarship to attend *PI Crash Course: Skills for Future or New Lab Leaders* workshop
- 2020 Princeton Physics Departmental Teaching Award
- 2014-2017 NSERC Doctoral Postgraduate Scholarship: ranked 3rd of 204 (\$63,000)
 - 2014 Google Summer of Code grant to work at Columbia University
 - 2013 Julie Payette NSERC Research Scholarship: awarded to the top 24 out of 1575 applicants in the Canada-wide Postgraduate Scholarships M competition (\$25,000)
 - 2013 Commonwealth Scholarship, DPhil studies at University of Oxford (declined, £95,625)
 - 2013 The Faculty of Science Moyse Travelling Scholarship, McGill University (\$10,000)
 - 2013 Delta Upsilon Graduate Scholarship, McGill University (\$5,000)
 - 2013 Travel award, KAUST WEP Conference

- 2012 First Prize for best poster, Canadian Undergraduate Physics Conference (Vancouver)
- 2012 Second Prize, McGill Faculty-wide Undergraduate Research Conference
- 2012 Third Prize, McGill Department of Physics Poster Conference
- 2010-2012 Estonian Foundation of Canada Scholarship
 - 2009 Annette S. Hill McGill Scholarship
 - 2008 Harry Elton Memorial Award, Embassy of the People's Republic of China in Canada

consulting

2022-present Morphood

technical writing

- J. Altosaar. How does physics connect to machine learning?

 Authored longform article that generated 30k pageviews with an average read time of 8 minutes.
- 2016 J. Altosaar. *Variational autoencoder tutorial*.

 Authored longform article that generated 400k pageviews with an average read time of 10 minutes. Used as a reference in courses at the University of Toronto and New York University.

teaching experience

- 2019-2020 Assistantship in Instruction, Princeton University PHY301: Thermal Physics.
- 2018-2020 Assistantship in Instruction, Princeton University PHY525: Introduction to Condensed Matter Physics.
 - 2018 Instructor, Summer Program on Applied Rationality and Cognition (https://sparc-camp.org/)

Taught machine learning and emotional intelligence to high schoolers. Rated easiest to connect with by students. Sample anonymous student feedback: "particularly easy to approach."

- Spring 2014 **Instructor, Princeton University Splash.** Taught high school students; average rating 4.38/5 teaching quality.
- Winter 2013 **Teaching Assistant, McGill University**. Applied Linear Algebra (Prof. Adam Oberman)
- Winter 2012 **Teaching Assistant, McGill University.** Honours Complex Variables (Prof. Robert Seiringer-fun fact, TA'ed for Beff Jezos here:)
 - Fall 2011 Teacher, Montreal Estonian Society Kindergarten
 - Fall 2011 Mentor, McGill University Buddy Program

advising and mentorship

Work with PhD, Master's, undergraduate, and high schoolers has resulted in several publications.

- 2021 Benjamin Guzovsky (Princeton University)
- 2021 Anton Stengel (Princeton University)
- 2021 Alexander Pesendorfer (Princeton University)
- 2020 Gabe Reder (Stanford University)
- 2020–2021 Rohan Bansal (Central High School '20, MO ightarrow Stanford University)
 - 2017 Abhishek Bhatia (M.Sc. '18, Columbia University)
 - 2016 Eamonn Bell (Ph.D. '18, Columbia University)
- 2015-2019 Smiti Kaul (Wake Forest University)
 - 2014 Ethan Benjamin (M.Sc. '14, Columbia University)
 - 2014 Jingwei Zhang (M.Sc. '14, Columbia)
 - 2014 Andrew James Mercer-Taylor (B.Sc. '15, Columbia University)
 - 2014 Anjishnu Kumar (M.Sc. '14, Columbia University)
 - 2014 Tony Paek (M.Sc. '15, Columbia University)
 - 2014 Drishan Arora (M.Sc. '14, Columbia University)

talks

- 2022 Google Health Bioethics Summit Panelist
- 2022 Music Tech Festival Labs Keynote
- 2022 NIH AIM-AHEAD Inaugural Conference, Invited Keynote: https://bit.ly/onefact-keynote
- 2022 AI For Health Equity Symposium, 6h Deep Learning Workshop
- 2022 Society for Digital Mental Health Flash Talk
- 2022 OpenMRS Technical Action Committee Invited Talk
- 2022 University of Maryland Colloquium
- 2021 Columbia University, Data Science Institute Scholars seminar series
- 2021 Andrew Marks Lab, Physiology and Cellular Biophysics Department, Columbia University
- 2021 Weight Watchers International, Inc. invited seminar to data science team
- 2021 Invitae invited talk for computational biology group
- 2021 Johnson & Johnson invited talk on ClinicalBERT for the Office of the Chief Medical Officer
- 2021 Panelist, New York University AI School
- 2020 Lena Mamykina lab seminar, Columbia University
- 2020 Probabilistic Modeling in Support of Science; invited talk. Caltech; University of California, Irvine; University of Southern California; Scripps Research Institute; University of Toronto, Vector Institute; Stanford University; University of Pennsylvania; MSKCC
- 2018 Food recommendation with deep exponential families. Keynote. *North Star AI Conference, Estonia*
- 2017 Bloomberg L.P. Machine Learning Group
- 2017 New York Times, Machine Learning & Cooking editorial teams
- 2017 Northeastern University, Network Science Institute seminar

- 2016 Imperial College, London, machine learning seminar.
- 2016 Machine Intelligence Research Institute Colloquium Series on Robust and Beneficial AI
- 2012 Canadian Undergraduate Physics Conference, University of British Columbia
